Why Mario chose Teacher Home Stay, Gozo

- Caters for both Executives and Families
- Full immersion learning experience
- All year round tuition
- Flexibility in courses and lessons
- The breathtaking beauty of Gozo

What Mario's friend has to say:

My experience on the island of Gozo was wonderful. I stayed in Marsalforn in August in a nice seafront hotel. In the morning I had individual lessons that helped me to improve my English where necessary. The locals were very kind to tourists and I found that I could practise my English with them.

Gozo is a magical island where I spent my free time exploring amazing places. One of the best places is 'Dwejra' where you can see the The Azure Window, a natural formation of rocks forming an arch above the sea. Do not miss the chance of admiring the dazzling blue lagoon while passing through the spectacular cave of The Azure Window on a typical Maltese boat! I highly recommend that people experience this lovely island and spend a truly relaxing holiday there.

As you might already know and in keeping with our paperless vision INTERNATIONAL HOUSE MALTA is moving towards a more interactive teaching style. In order to help you understand more fully what this is all about, we would like to introduce you to our new teaching concept.

[CLICK HERE TO VIEW FLYER](#)

INTERACTIVE TEACHING STYLE COURSE

The INTERACTIVE TEACHING STYLE course is a blend of successful traditional teaching methods and the latest technology used to enhance the English language learning experience in a student-centred classroom.

What are the advantages of having this INTERACTIVE TEACHING STYLE in the classroom?

Over the last twenty years, the field of cognitive science has taught us a lot about how people learn. If our brain does not take in information, look for connections, interpret and make sense of something on its own, learning may not be successful. The INTERACTIVE TEACHING STYLE course allows a 'hands-on' learning experience and with its many advantages, it is the latest trend in learning in the 21st Century.

What is the role of the teacher?

The teacher has a CENTRAL ROLE in an Interactive Teaching Style Classroom. While this course is technology-based, it still requires a well-prepared teacher coordinating and leading the lesson, guiding students in class to a better understanding of the English language.

How does an Interactive Teaching Style course work?

The key word to such learning is 'Interaction'. The lesson content is displayed on the INTERACTIVE WHITE BOARD. Using their tablets, laptops or traditional pen and paper, students interact and discuss the course content with their teacher and classmates.

How will students benefit from being in an Interactive Teaching Style class?

The interactive tools on the IWB & e-Book enhance learning in many ways. INTERACTIVE TEACHING STYLE courses offers several benefits to learning:

- Raising the level of student engagement in the classroom
- Motivating students and promoting enthusiasm for learning
- Beneficial to students who have a hearing or visual impairment

Such Interactive learning gives a hands-on experience and a 'learn-as-you-try' approach which maximizes learning ... in addition it is fun and engaging for the students!

INTERACTIVE TEACHING STYLE is a new learning style which has shown that interacting is the key to better learning. Not only do students benefit by being intrinsically motivated, but the Interactive Teaching Style is an external motivator, as teaching with Interactive Whiteboards and e-Books is "more fun, more engaging, more exciting and has an impact on the enjoyment, speed and depth of learning" (Lee & Boyle, 2003).

Lee, M & Boyle, M (2003) *The Educational Effects and Implications of the Interactive Whiteboard Strategy*
